Endnotes and Abbreviations:

* Denotes a chemical agent listed in Table 1 of Ontario Regulation 490/09 (Designated Substances) made under the Act. See clause 2 (2) (a) of this Regulation.

¹ Means the benzene soluble fraction of total particulate matter of the substances emitted into the atmosphere from metallurgical coke ovens including condensed vapours and solid particulates.

² As sum of components assayed by chromatographic procedure with reference to the bulk sample.

[CAS No.] - CAS Registry Number.

f/cc - Fibres per cubic centimetre of air.

mg/m³ - Milligrams of the agent per cubic metre of air.

ppm - Parts of the agent per million parts of air by volume.

Skin - Danger of cutaneous absorption.

(E) The value is for particulate matter containing no asbestos and < 1 per cent crystalline silica.

(F) Respirable fibres: length > 5µm; aspect ratio ≥3:1, as determined by the membrane filter method at 400-450 times magnification (4-mm objective), using phase-contrast illumination.

(H) Aerosol only.

(I) Inhalable fraction: means that size fraction of the airborne particulate deposited anywhere in the respiratory tract and collected during air sampling with a particle size-selective device that, (a) meets the ACGIH particle size-selective sampling criteria for airborne particulate matter; and (b) has the cut point of 100 μm at 50 per cent collection efficiency.

(K) Should not exceed 2 mg/m^3 respirable particulate mass.

(L) Exposure by all routes should be carefully controlled to levels as low as possible.

(R) Respirable fraction: means that size fraction of the airborne particulate deposited in the gas-exchange region of the respiratory tract and collected during air sampling with a particle size-selective device that, (a) meets the ACGIH particle size-selective sampling criteria for airborne particulate matter; and (b) has the cut point of 4 μm at 50 per cent collection efficiency.

(V) Vapour and aerosol.

(a) Provided that the total dust contains less than 0.7 per cent vanadium.

(b) For assessing the visibility in a work environment where 1,2-propylene glycol aerosol is present.

(c) A secondary limit of 5 mg/m^3 (total dust) is recommended to deal with dusty operations where fibre counts are usually difficult to determine. Where both types of measurements are made simultaneously, the more restrictive limit should be used to assess the exposures.

Commencement

3. This Regulation comes into force on the later of July 1, 2015 and the day it is filed.

¹ Fraction soluble dans le benzène de la matière particulaire totale des substances rejetées dans l'atmosphère par les fours à coke métallurgique, y compris les vapeurs condensées et les particules solides.

² Somme des composants dosés par la méthode chromatographique par rapport à l'échantillon global.

[numéro CAS] - numéro de registre CAS.

f/cc - Fibres par centimètre cube d'air.

mg/m³ - Milligrammes par mètre cube d'air.

ppm - Parties par million de parties d'air par volume.

Peau - Danger d'absorption cutanée.

(E) Valeur donnée pour la matière particulaire ne contenant pas d'amiant et dont la teneur en silice cristalline est inférieure à 1 %.

(F) Fibres respirables : longueur supérieure à 5 µm; rapport longueur-diamètre supérieur ou égal à 3:1, déterminé par la méthode de filtration par membrane à un grossissement de 400 à 450 fois la grandeur réelle (objectif de 4 mm), en utilisant un éclairage par contraste de phase.

(H) Aérosol seulement.

(I) Fraction inhalable : la tranche granulométrique des particules en suspension dans l'air qui sont déposées où que ce soit dans les voies respiratoires et recueillies lors d'un échantillonnage de l'air à l'aide d'un appareil de sélection granulométrique qui : a) satisfait aux critères de sélection granulométrique établis par l'ACGIH; b) a un point de coupure à 100 µm à 50 % d'efficacité.

(K) Ne devrait pas dépasser 2 mg/m³ de masse de particules respirables.

(L) L'exposition par toutes les voies devrait être maintenue aux niveaux les plus bas possibles.

(R) Fraction respirable : la tranche granulométrique des particules en suspension dans l'air qui sont déposées dans la zone d'échange de gaz des voies respiratoires et recueillies lors d'un échantillonnage de l'air à l'aide d'un appareil de sélection granulométrique qui : a) satisfait aux critères de sélection granulométrique établis par l'ACGIH; b) a un point de coupure à 4 µm à 50 % d'efficacité.

(V) Vapeur et aérosol.

a) À condition que les poussières totales contiennent moins de 0,7 % de vanadium.

b) Pour l'évaluation de la visibilité dans l'environnement de travail en présence de 1,2-propylène glycol en aérosol.

c) Une limite secondaire de 5 mg/m³ (poussières totales) est recommandée dans le cas d'activités dégageant de la poussière lorsque le dénombrement des fibres est habituellement difficile à effectuer. Lorsque les deux types de mesure sont effectués simultanément, il faut utiliser la limite la plus restrictive pour évaluer les expositions.

2. If the controllers of each of the agricultural operations subject to the GNF plan reasonably expect none of the criteria set out in subsection 24 (2) to be met on the farm unit during the current calendar year and provide written notice of this to the Director stating that the controllers no longer wish the operations to be subject to the plan, the plan ceases to apply in respect of all of the operations on the later of the day requested by the controllers in the notice and the day that the notice is received by the Director.
3. If any controller of an agricultural operation subject to the GNF plan provides written notice to the Director and to the controllers of each of the other agricultural operations subject to the plan stating that the controller no longer wishes the operation to be subject to the plan, the plan ceases to apply in respect of the operation on the later of the day requested by the controller in the notice and the day that the notice is received by the Director.

Agricultural operations, GNF

61. (1) If the sampling and analysis carried out in respect of GNF under this Part does not provide results that are representative of the GNF that is to be applied to land because the GNF was subsequently mixed or because the GNF is greater than or equal to 1 per cent dry matter, a controller of the agricultural operation at which the GNF is to be applied to land shall ensure that sampling and analysis of the GNF is carried out before the land application to determine the concentration of each Category 1 parameter in the GNF.

(2) For the purposes of this section, a minimum of one sample of GNF must be taken and the average of the results from all available samples of GNF must be used.

66. (1) If the total concentration in the soil of plant available phosphorus, as determined in accordance with the GNF Sampling and Analysis Protocol, is greater than or equal to 60 milligrams per litre, no person shall apply the GNF to land if the application, when combined with any phosphate added to the soil from other nutrient sources, results in an amount of

phosphate per hectare being added to the soil during any consecutive five calendar years, that exceeds the greater of the following:

1. The crop production requirements for phosphate per hectare for the five-year period plus 85 kilograms of phosphate per hectare.
2. The phosphate removed from the land per hectare in the harvested portion of the crop during the five-year period.

(3) If, in a given year, no crops are planted or the dormancy date cannot be determined, August 31 is deemed to be the date upon which the cropping year begins or ends.

Boron

68. The maximum rate of land application for GNF with reference to boron is a rate such that, when combined with any boron added to the soil from non-agricultural source materials, the amount of boron added to the soil in any 12-month period does not exceed one kilogram of boron per hectare.

La personne qui est liée par un cautionnement peut l'annuler en remettant au registrateur et à l'agence de recouvrement qui y est désignée un préavis écrit d'au moins deux mois de son intention d'annuler le cautionnement. Sous réserve de l'article 4, le cautionnement est réputé annulé à la date indiquée dans l'avis, laquelle ne doit pas être antérieure à deux mois après la réception de l'avis par le registrateur.

4. Le cautionnement reste en vigueur et la garantie accessoire, le cas échéant, demeure en dépôt pour une période de deux ans après la radiation de l'inscription ou l'annulation du cautionnement, selon le cas, aux fins de tout acte ou de toute omission survenant :

- a) soit pendant la période d'inscription;
- b) soit pendant la période qui précède l'annulation du cautionnement en vertu de l'article 3, si l'inscription n'a pas été radiée.

5. Si le cautionnement a été annulé ou que l'inscription a été radiée et que le cautionnement n'a pas été confisqué, le ministre des Finances peut, deux ans après la radiation de l'inscription à laquelle se rapporte le cautionnement ou deux ans après l'annulation du cautionnement, remettre la garantie accessoire à la personne qui l'a déposée.

6. Le registrateur peut déclarer la confiscation du cautionnement visé à l'article 2 dans l'un ou l'autre des cas suivants :

- a) l'agence de recouvrement dont le cautionnement garantit la conduite ou un de ses agents de recouvrement ou représentants a été déclaré coupable :
 - (i) soit d'une infraction à la Loi,
 - (ii) soit d'une infraction comportant une fraude ou un vol ou d'un complot en vue de commettre une telle infraction, au sens du *Code criminel* (Canada),

et la déclaration de culpabilité est devenue définitive;

- b) l'agence de recouvrement — y compris tout associé d'une société de personnes — dont le cautionnement garantit la conduite a introduit une instance en vertu de la *Loi sur la faillite et l'insolvabilité* (Canada) ou une instance de mise en liquidation ou est visée par une telle instance et il a été rendu une ordonnance de séquestre en vertu de la *Loi sur la faillite et l'insolvabilité* (Canada) ou une ordonnance de mise en liquidation, et l'ordonnance est devenue définitive;
- c) un jugement fondé sur une constatation de fraude a été rendu contre l'agence de recouvrement — y compris tout associé d'une société de personnes — dont le cautionnement garantit la conduite ou contre un agent de recouvrement ou autre représentant de l'agence de recouvrement relativement à des sommes d'argent recouvrées pour toute autre personne, et le jugement est devenu définitif;
- d) un jugement a été rendu contre l'agence de recouvrement — y compris tout associé d'une société de personnes — dont le cautionnement garantit la conduite ou contre un de ses agents de recouvrement ou autres représentants à l'égard d'une réclamation portant sur une question de recouvrement, et le jugement n'a pas été exécuté dans un délai de 90 jours.

Dès lors, le montant du cautionnement devient dû et exigible auprès de la personne liée par celui-ci à titre de créance de la Couronne du chef de l'Ontario.

7. Si le cautionnement garanti par le dépôt d'une garantie accessoire est confisqué en vertu de l'article 6, le ministre des Finances peut vendre le bien constituant la garantie accessoire au prix du marché.

8. Si la Couronne du chef de l'Ontario devient le créancier d'une personne à l'égard d'une créance de la Couronne découlant de l'application de l'article 6, le registrateur peut introduire l'instance qu'il juge appropriée en vertu de la *Loi sur la faillite et l'insolvabilité* (Canada), de la *Loi sur les tribunaux judiciaires*, de la *Loi sur les personnes morales* ou de la *Loi*

sur les liquidations et les restructurations (Canada) en vue de la nomination d'un séquestre intérimaire, d'un dépositaire, d'un syndic, d'un séquestre ou d'un liquidateur, selon le cas.

9. (1) Du moment que la réclamation a été présentée ou que l'opération a été faite au cours de la période visée à l'alinéa 4 a) ou b), le ministre des Finances peut, à sa discrétion :

- a) céder le cautionnement confisqué en vertu de l'article 6 et transférer la garantie accessoire, le cas échéant;
- b) remettre les sommes d'argent recouvrées aux termes du cautionnement;
- c) remettre le produit de la vente du bien constituant la garantie accessoire en vertu de l'article 7,

à toute personne qui, selon le cas :

- d) est un créancier judiciaire de l'agence de recouvrement — y compris tout associé d'une société de personnes — dont le cautionnement garantit la conduite ou contre un de ses agents de recouvrement ou autres représentants, si le jugement est fondé sur une réclamation découlant d'une opération portant sur une question de recouvrement;
- e) convainc le registrateur du bien-fondé de la réclamation de moins de 100 \$ qu'elle présente contre l'agence de recouvrement — y compris tout associé d'une société de personnes — dont le cautionnement garantit la conduite ou contre un de ses agents de recouvrement ou autres représentants, si la réclamation découle d'une opération portant sur une question de recouvrement;
- f) établit le bien-fondé d'une réclamation en faillite contre l'agence de recouvrement — y compris tout associé d'une société de personnes — dont le cautionnement garantit la conduite à l'égard d'une réclamation découlant d'une opération portant sur une question de recouvrement.

(2) Lorsqu'il l'estime souhaitable, le ministre des Finances peut, sans ordonnance, remettre la totalité ou une partie du produit visé à l'alinéa (1) b) ou c) au comptable de la Cour supérieure de justice en fiducie pour les personnes qui ont droit à une quote-part du produit du cautionnement en vertu du paragraphe (1), ou qui peuvent acquérir ce droit.

10. Si le cautionnement a été confisqué et que le ministre des Finances n'a pas, dans les deux ans suivant la confiscation, reçu d'avis écrit d'une réclamation visant le produit du cautionnement ou la partie du cautionnement qui demeure entre ses mains, le ministre des Finances peut remettre le produit du cautionnement ou la garantie accessoire, ou ce qu'il en reste, à quiconque a effectué un paiement aux termes du cautionnement ou a déposé la garantie accessoire, après déduction du montant des dépenses qui ont été engagées relativement à une enquête ou qui se rapportent par ailleurs à l'agence de recouvrement dont le cautionnement garantissait la conduite.

The amendments to NI 31-103 and NI 33-109 (with related amendments to OSC Rule 33-506 and OSC Rule 35-502) represent general improvements to the registrant regulatory framework that the Canadian Securities Administrators (CSA) have identified. These amendments range from technical adjustments to more substantive matters, which promote stronger investor protection by resolving ambiguities and clarifying the CSA's intentions, in order to enhance compliance and create efficiencies for industry and regulators. The amendments to the other listed instruments and rules are of a "housekeeping" nature and include changes to reflect the change in the title of NI 31-103 from "Registration Requirements and Exemptions" to "Registration Requirements, Exemptions and Ongoing Registrant Obligations" that came into force on July 11, 2011, which were overlooked at that time.

The full text of the above amendments is available in the Ontario Securities Commission's Bulletin at (2014) 37 OSCB (Supp-5) and on the Commission's website at <http://www.osc.gov.on.ca>.

Amending Reg. 402 of R.R.O. 1990
(CHICKENS - MARKETING)

1. (1) Subsection 18 (1) of Regulation 402 of the Revised Regulations of Ontario, 1990 is revoked and the following substituted:

(1) Subject to subsections (6) and (7), the negotiating agency may adopt or settle by agreement the minimum live prices for chickens or for any class, variety, grade or size of chickens in accordance with this section.

(1.1) In this section,

“chick” means a chicken that is less than seven days of age; (“poussin”)

“feed” means broiler chicken feed; (“nourriture”)

“quota period” means a quota period established by the local board for the purposes of sections 10 and 11. (“exercice contingentaire”)

(2) Subsections 18 (2) to (5.1) of the Regulation are revoked and the following substituted:

(2) Beginning with quota period A129 in 2015, the negotiating agency shall negotiate the minimum live prices for chickens by applying the following formula and negotiating adjustments to the various components of the formula in accordance with subsections (3), (4), (5), (5.2) and (5.3):

$$MLP = (CP + FP + PM) - AA$$

Where,

MLP means the minimum live price for chickens;

CP means the live chick price for sexed mixed chicks established by the Ontario Broiler Hatching Egg and Chick Commission for each quota period, expressed in dollars per kilogram of live chicken, and adjusted as necessary by the negotiating agency each quota period;

FP means the weighted average feed price derived from at least three independent Ontario feed mills with the largest volume of sales of chicken broiler feed that is reported by the Ontario Agri Business Association for each quota period, expressed in dollars per kilogram of live chicken, and adjusted as necessary by the negotiating agency each quota period;

PM means the producer margin, being the sum of the costs and expenses described in Column 2 of Table 1 of this section, as those costs and expenses are valued by the negotiating agency annually under subsection (4); and

AA means the three annual adjustments described in Schedule 1.

(3) The negotiating agency shall negotiate the chick price and feed price each quota period.

(4) Each year, the negotiating agency shall negotiate the value of each of the costs and expenses described in Column 2 of Table 1 of this section, other than the costs and expenses referred to in items 9, 10 and 11 of the Table that have a fixed value set out in Column 3 of the Table, and the renegotiated values shall take effect at the beginning of the first full quota period of the year.

(5) Despite subsection (4), the values of any costs and expenses that are to be negotiated annually under that subsection may be negotiated more frequently than annually if exceptional and unforeseen circumstances exist.

(5.1) If the values of any costs and expenses are negotiated more frequently than annually in accordance with subsection (5), the renegotiated values shall take effect at the beginning of the quota period that follows the conclusion of the negotiations and shall remain in effect until the beginning of the first full quota period of the following calendar year.

(5.2) The three annual adjustments described in Schedule 1 shall be agreed to by the negotiating agency each year and shall take effect at the beginning of the first full quota period of the year.

(5.3) Despite subsections (2) to (5.2), the negotiating agency shall negotiate the minimum live prices for chickens for quota period A129 by applying the formula set out in subsection (2), subject to the following rules:

1. The chick price shall be determined by using the amount of \$0.3275 as the chick price for quota period A121 and negotiating adjustments to that amount to reflect the changes from quota period A121 to quota period A129.
2. The feed price shall be determined by using the amount of \$0.7094 as the feed price for quota period A121 and negotiating adjustments to that amount to reflect the changes from quota period A121 to quota period A129.
3. The producer margin shall be determined by using the sum of the values set out in Column 3 of Table 1 of this section as the producer margin for quota period A121 and negotiating adjustments to those values, other than the values set out in items 9, 10 and 11 of Column 3 of the Table that are fixed values, to reflect the changes from quota period A121 to quota period A129.
4. The negotiating agency shall determine the volume adjustment for quota period A129, in the following manner:
 - i. Determine the volume adjustment for quota period A129 in accordance with paragraphs 1, 2 and 3 of section 1 of Schedule 1.
 - ii. Determine the volume adjustment for quota period A122 in accordance with paragraphs 1, 2 and 3 of section 1 of Schedule 1, using the values set out in Column 3 of Table 1 of this section for the purposes of the multiplication required under paragraph 3 of section 1 of Schedule 1.
 - iii. Determine the sum of the amounts determined under subparagraphs i and ii.
5. The negotiating agency shall determine the feed efficiency adjustment for quota period A129 in the following manner:
 - i. Determine the average of the feed prices, expressed in dollars per tonne, that were used to determine the minimum live prices for chickens during the previous 12-month period and multiply that average feed price by 0.000014.
 - ii. Determine the average of the feed prices, expressed in dollars per tonne, that were used to determine the minimum live prices for chickens during the 12-month period that preceded the 12-month period referred to in subparagraph i and multiply that average feed price by 0.000014.
 - iii. Determine the sum of the amounts determined under subparagraphs i and ii.
